➤ Multi-Currency

➤ Multi-company & Branches

➤ User friendly

Maintenance Management System Features

Maintenance module enables you creating preventive maintenance schedules, deal with emergency breakdowns and assign them to the involved employee and related machine.

- Preventive maintenance scheduling: Central management for all the preventive maintenance.

- Ability to set a maintenance procedure according to a schedule (from date to date, weekly, monthly, annually) and assign them to employees.

- Ability to set a maintenance procedure according to a customizable parameter (e.g. 20,000 KVA, 100 km...)

- Breakdowns management: Follow breakdowns with notification system linked to the manufacturing module.

- Easily assign preventive maintenance, emergency breakdowns, and general maintenance procedures for each machine.

- Maintenance operations management (internally & externally).

- Tasks Scheduler (Daily tasks management)

- Maintenance cost management

- Spare parts management

- Alert management system

- Reports: Daily Activities, Breakdowns, Repairing, Materials consumption, etc.

- Produce status reports and documents giving details or summaries of maintenance activities.

- Report for machine depreciation & fixing costs

- Dashboards: Gives you the conclusion of daily actions
