Overview

ATMIT Maintenance Management System enables sharing maintenance information and business processes with all members of your maintenance team, contractors and clients. Team members can get up-to-date information 24hours a day from any location.

This information is intended to help maintenance workers do their jobs more effectively and to help management make more informed decisions.

Maintenance Management software is used to verify regulatory compliance.

General Features

- Web-based
- More secure connection using SSL protocol
- Multi-language: Arabic, English & others
- Multi-Currency
- Multi-company & Branches
- User friendly

Maintenance Management System Features

Maintenance module enables you creating preventive maintenance schedules, deal with emergency breakdowns and assign them to the involved employee and related machine.

- Preventive maintenance scheduling: Central management for all the preventive maintenance.
- Ability to schedule the preventive maintenance according to sales/purchases contracts.
- Ability to set a maintenance procedure according to a schedule (from date to date, weekly, monthly, annually as well as manual scheduling); taking into consideration weekend & official holidays set in the Attendance Monitor Module, and assign the procedure to employees.
- Ability to set a maintenance procedure according to a customizable parameter (e.g. 20,000 KVA, 100 km...).
- Breakdowns management: Follow breakdowns with notification system linked to the manufacturing module.
- Easily assign preventive maintenance, emergency breakdowns, and general maintenance procedures for each machine.
- Maintenance operations management (internally & externally).
- Tasks Scheduler (Daily tasks management).

➤ Maintenance cost management.

➤ Spare parts management.

➤ Alert management system: alerts can be sent to third party from the system using Outlook/iCal formats.

➤ Reports: Daily Activities, Breakdowns, Repairing, Materials consumption, etc.

➤ Produce status reports and documents giving details or summaries of maintenance activities.

➤ Report for machine depreciation & fixing costs.

➤ Dashboards: Gives you the conclusion of daily actions.

Third Parties Benefits

- 24/7 Online access to data through Mobile App and Portal.
- Maintenance requests are managed through the Mobile App/Portal allowing a quick response due to the efficient workflow that is controlled through the portal.

- Automated emails generated through all the steps within the workflow.
- Electronic signature and printout of service ticket validating the maintenance accomplishment.
- Ability to customize Mobile App and Portal in relation to maintenance module transactions and reports.
- Portal customization can include all modules within ATMIT Enterprise system.
- Third party software integration, enabling live data synchronization between clients'/suppliers' software and ATMIT Enterprise.
- Pro-Scan Mobile Barcode Reader facilitating reading barcodes using cameras on Smart devices.
- Barcode check-in insuring full control of service provider on premises.
- Mobile App and Barcode Reader are available on both Google play and Apple store.
